

Year 2 – Summer 1

<p>Science</p> 	<p>To be completed during the week beginning 21st April 2025</p> <p>Deciduous trees lose their leaves in autumn and winter - this makes it harder to identify them. Tree bark is another way to identify a tree as they have different patterns. Collect bark rubbings from different trees by pressing a piece of paper against the tree trunk and rubbing a crayon over the paper. Which way works best – up and down or left to right? How are the patterns different?</p>
<p>Technology</p> 	<p>To be completed during the week beginning 28th April 2025</p> <p>Use technology to locate the four countries of the United Kingdom and their capital cities. Can you also search for any other meaningful places to you within the United Kingdom?</p>
<p>Engineering</p> 	<p>To be completed during the week beginning 5th May 2025</p> <p>Create a working catapult using only three materials: sticks, elastic bands and a spoon. Search online for some inspiration on what this could look like.</p>
<p>Arts</p> 	<p>To be completed during the week beginning 12th May 2025</p> <p>Use different utensils found in your kitchen to create a beat by hitting different items together to make sounds.</p>
<p>Maths</p> 	<p>To be completed during the week beginning 19th May 2025</p> <p>Practise telling the time using a clock face at home. Can you draw a clock face to show what time you completed an activity during your morning routine? What time did you wake up, eat breakfast, get dressed, leave for school, etc.?</p>

Children in Year 2 can bring any STEAM Challenge work they complete into school or submit it to the year group homework email address –
